Control Reference Strains from Microbiologics

With over 900 strains available in a variety of user-friendly formats, Microbiologics offer the largest and most diverse line of QC microorganisms including qualitative, quantitative, Certified Reference Material and Parasite Suspensions.

Reference strains for:

- Growth Promotion Testing
- Sterility Assurance Testing
- Antimicrobial Effectiveness Testing
- Media Challenge Testing
- Microbial Enumeration Testing
- Water Testing
- Environmental Testing
- Disinfectant Qualification Testing
- Food and Food Ingredients: Enumeration of Indicator/Spoilage Microorganisms
- Food and Food Ingredients: Pathogen Testing

Culture media, supplements and detection kits from Biokar

Rapid and Chromogenic methods for the detection and enumeration of:

- Bacillus cereus
- Escherichia coli and coliforms
- Enterococci
- Staphylococci
- Salmonellae
- Yeasts and molds
- Cronobacter
